R Markdown Skeleton

Author's Name

```
#### note ``` (3 backticks)
##### R code goes in here.  Set code chunk environment options above

y <- 2 + 2

print(y)
```

```
## [1] 4
```

Document environment. Accepts text like this

Accepts HTML/CSS

and LaTeX equations: $y = b_0 + b_1 x$

You can also take a result from a previous R environment and display it inline, like so, $y = 4$.
